nurture YOUR EYES

with FRESHKOTE® Preservative Free

A fresh approach to soothing dry eye symptoms

FRESHKOTE®
Preservative Free
LUBRICANT EYE DROPS

What is dry eye?

Dry eye can occur when the eyes do not produce enough tears or when tears dry too quickly on the surface of the eye.

► Some causes of dry eye

Dry eye symptoms can be associated with age and certain health conditions.

Symptoms can also be affected by:

- Prolonged screen time
- Extended contact lens wear
- Cataract or LASIK surgery
- Medications like oral antihistamines or antidepressants
- Low humidity

► Understanding the impact of dry eye

Left untreated, dryness can damage the surface of the eye and increase irritation, leading to further discomfort, scratchiness, redness, or excessive tearing.

FRESHKOTE® Preservative Free nurtures dry eyes

FRESHKOTE Preservative Free offers soothing relief from dry eye symptoms and reduces further irritation while **providing comfort that lasts**, even with contact lenses.

► FRESHKOTE Preservative Free works to lubricate dry eyes and keep tears from evaporating

The active ingredients in FRESHKOTE Preservative Free are designed to promote thorough wetting of the eye. They also **help nourish dry eyes** by keeping the eyes' tear film (the lubricating layers) wet, **so eyes stay lubricated.**

FRESHKOTE Preservative Free does not contain preservatives, which could irritate the surface of the eye.

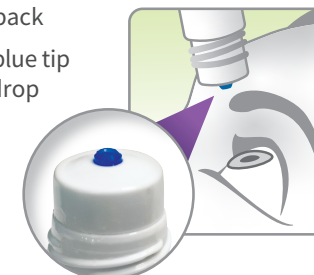

FRESHKOTE®
Preservative Free
LUBRICANT EYE DROPS

FRESHKOTE® comes in a state-of-the-art multi-dose bottle to dispense precise, preservative-free drops.

How to administer FRESHKOTE Preservative Free

1. Tilt the head back
2. Focus on the blue tip to direct the drop into the eye
3. Gently squeeze bottle
